

TSX-CU203AS F1

FLOWER HABIT: PF
 HR: Ccu
 IR: Co, Psl, Pcu, Px, ZYMV, CMV, WMV
 High quality for ground production.

American Slicer

VARIETY	FLOWER HABIT*	DISEASE RESISTANCE	NOTES
TSX-CU201AS F1	MO	HR: Ccu, ZYMV, IR: Co, Psl, Pcu, Px, CMV, WMV	High yielding. Excellent for trellising.
TSX-CU208AS F1	GY, P	HR: Ccu, IR: Px, Cca	Parthenocarpic for indoor production. Smooth and dark green.
TSX-CU231AS F1	PF	HR: Ccu, ZYMV, Pcu, IR: Px, Co, PIs, CMV, WMV	Excellent fruit quality, strong resistance.
TSX-CU234AS F1	MO	HR: Ccu, ZYMV, IR: Px, Pcu, Cca, Co, PIs, CMV, WMV	Improved Downy Mildew resistance plus target leaf spot.

*MO: monoecious, PF: predominantly female, GY: gynoecious, P: parthenocarpic

DISEASE CODE	COMMON NAME	LATIN NAME
Cca	Target Leaf Spot	<i>Corynespora cassicola</i>
Ccu	Scab/Gummosis	<i>Cladosporium cucumerinum</i>
CMV	Cucumber Mosaic Virus	
Co	Anthraxnose	<i>Collectotrichum orbiculare</i>
Pcu	Downy Mildew	<i>Pseudoperonospera cubensis</i>
Psl	Angular Leaf Spot	<i>Pseudomonas syringae pv. Lachrymans</i>
Px	Powdery Mildew	<i>Podosphaera xanthii</i>
PRSV	Papaya Ring Spot Virus	
WMV	Watermelon Mosaic Virus	
ZYMV	Zucchini Yellow Mosaic Virus	

Japanese Cucumber: Natsu

Natsu (meaning "summer") is a new easy-to-grow and delicious Japanese cucumber. Selected to be single-stem, it requires little vine maintenance compared to other Japanese cucumbers, while producing abundant harvests.

Japanese cucumbers are distinguished by their dark green, crisp skin and long, thin shape. Crunchy even when sliced thin, they are perfect for quick pickles and summer salads.

NATSU F1

FLOWER HABIT: GY, P

IR: Cca, Px

Strong powdery mildew resistance and small dark green leaves. Very easy to grow and manage.

Uniquely gynoeocious and parthenocarpic.

Trial number: TSX-CU235JP.

Sunomono, lightly vinegared Japanese cucumber salad
